

FOOD-TRAK BOOT CAMP ON THE ROAD

Camp Description

FOOD-TRAK® Boot Camp is an exciting 4-day course focused on learning how to become a proficient FOOD-TRAK user and drive cost savings to your organization's bottom line.

You will be armed with the knowledge to construct, operate and maintain an effective food and beverage database. You will also learn and practice effective inventory techniques and methods, rapid and accurate recipe building, forecasting, ordering and procurement approaches. Additionally, you will gain competence with requisitions and transfers, waste and fabrication control variance tracking and report analysis.

This course was created and is presented by System Concepts, Inc., developer and manufacturer of FOOD-TRAK software

Overview

FOOD-TRAK Boot Camp is simply the best defense against escalating F&B costs. Our main objective is to help you bulletproof your F&B operation. Boot Camp will provide you with working knowledge of the FOOD-TRAK System, process flow, task operations, management and reports, arming you with everything you need to win the food cost battle.

Working with the latest version of FOOD-TRAK, you will be led by your drill sergeant through a series of lectures explaining the 'how to' functionality of each process, followed by practice exercises outlined in the comprehensive Boot Camp training manual. This "real world" foodservice operation approach prepares you to return to your place of business and make effective use of the FOOD-TRAK system.
