FOOD●TRAK® UNIVERSITY
THE FUNDAMENTALS

ONLINE INTERACTIVE EXPERIENCE

FOOD-TRAK University: The Fundamentals is an exciting online course focused on how to become a proficient FOOD-TRAK user and drive cost savings to your organization's bottom line. You will be given the instruction to construct, operate and maintain an effective food and beverage database while practicing inventory techniques and methods, forecasting, ordering and procurement approaches. Additionally, you will gain competence with requisitions and transfers, waste, and report analysis that will elevate your proficiency and make a valuable impact to your organization.

The Fundamentals course is simply the best way to acquire the skills needed to protect your organization from escalating F&B costs. Our main objective is to help you bulletproof your F&B operation by providing you with working knowledge of the FOOD-TRAK System, process flow, task operations, management and reports, giving you everything you need to control food costs.

Working on your own computer workstation and the latest version of FOOD-TRAK, you will be led by a live instructor through a series of lectures explaining the "how to" functionality of each process, followed by practice exercises outlined in the comprehensive training manual. This "real world" foodservice operation approach prepares you to make effective use of the FOOD-TRAK system.

"Taking FOOD-TRAK University: The Fundamentals training was very helpful for day-to-day operations. With The Fundamentals, it opened up a gateway of knowledge to make purchasing, requisitions and inventory much more efficient. Using what I learned from training helps me cut down on the time spent creating purchase orders, req's and updating inventory templates."
