FOOD®TRAK® WINE MODULE

OVERVIEW

The FOOD-TRAK® **Wine Module** helps clients effectively control their complex wine inventory. This module is ideal for clubs, hotels, restaurants and casinos that stock and sell significant varieties of bottled wine. Track which wines move quickly, which wines are overstocked and which wines are being sold at an incorrect price. The Wine Module saves time and takes the guesswork out of controlling and managing large wine inventories, allowing clients to maintain maximum control and generate the highest possible wine profits.

WINE ATTRIBUTE EDITOR

Attributes are characteristics of wine that make it unique, such as variety, vintage and origin. The Wine Attribute Editor allows clients to categorize each bottle of wine by various features and view inventory levels and transaction activity by feature categories. For instance, assigning wine varieties makes it possible to run reports showing all the Pinot Noir wines purchased, used, sold or currently in stock. The following attributes can be applied to each wine:

BRAND	Country		REGION	SUB-REGION	VINEYARD
	VINTAGE	Түре	Notes	VARIETAL	

WINE MODULE REPORTS

A variety of reports can be generated specifically for wine items within the database. These reports contain several types of analysis and summary information related to both inventory and procurement.

- ❖ PERPETUAL INVENTORY REPORT is perfect for identifying current inventory levels, wine usage and cost for a selected time period. The report takes into account all purchases, sales and transfers of wines, thus providing a way to spot check wine stock level. Wines can be sorted by attribute at a specific location or all locations.
- NVENTORY EXTENSION REPORT shows the value of selected wine items, such as Chardonnays or French wines, at a selected profit center.
- PURCHASE RECAP REPORT displays the purchase activity of selected wines over a specific time period with. This report also quickly pinpoints wine transaction history based on purchases.

Please contact an Account Manager for additional information and pricing.
